EXCERPTS ONLY

*“Then He said to them: Nation will rise against nation, and kingdom against kingdom. There will be great earthquakes, famines and pestilences in various places, and fearful events and great signs from heaven.*

*...There will be signs in the sun, moon and stars. On the earth, nations will be in anguish and perplexity at the roaring and tossing of the sea. Men will faint from terror, apprehensive of what is coming on the world, for the heavenly bodies will be shaken...”*

Luke 21: 10-11 & 25-26

## Focus: 5768

*(9/13/2007 - 9/29/2008)*

**4-29-05** - This is the first installment of a series I intend to continue for many months. The premise is simple: *For over a decade, I have focused my - and readers' - attention on the period of **2007/2008** as a time of great significance when a plethora of cycles aligns.* As this time frame nears, more and more cycles & Cycle Progressions come into play or focus, reinforcing the critical nature of this period.

More specifically, I have my sights set on the Jewish Year of **5768**, which begins on **Sept. 13, 2007 and ends on Sept. 30, 2008** (although the sacred year is offset by about 180 degrees). One important date during this year will be August 10, 2008 - Tisha B'Av.

However, there are also others. This cycle is linked to earth-disturbance cycles, geopolitical and war/peace cycles, market cycles and a host of other related and (seemingly) unrelated events and cycles. However, none appears as salient or as noteworthy as the cycles having to do with Israel, the Middle East and Europe.

My guess is that Jerusalem will play a key role in this cycle reaching fruition. I also expect Europe - both politically and religiously - will play a momentous role.

[www.insidetrack.com](http://www.insidetrack.com)

In the coming months/years, I want to examine numerous examples of the events & cycles leading me to this conclusion. In this context, it is important to remember that it is the **synergy** of these events and cycles - NOT necessarily their individual importance or lack thereof - that increases the significance of this period. For now, it is timely to examine one geometric cycle that initially links a couple key players. Cycles of 30, 60 & 90 degrees (years) - as well as 15, 45 & 75 degrees - all converge in **5768 (2008)**. It begins with the liberation of Jerusalem but ultimately incorporates the three key players: Political Europe (Brussels), Religious Europe (Rome) & Israel... ## **Focus: 5768 - Chapter II (excerpt)**

### ***The Grand Cycle***

**5-31-05** - Cycles continue to focus attention on the period of **2007/2008** as a time of great significance, when dramatic events are likely. The above paragraphs touch on yet another group of cycles (related to Turkey, which occupies some of the ancient land of **Magog**)...I began my explanation/elaboration on this cycle last month with a unique sequence of geometric time frames (multiples of 15 & 30 years) that link Israel, political Europe and religious Europe... and converge in 2008/5768. This month, I want to sharpen this focus and only discuss one time period - **the period of 60 years**. ..it is sobering how many different events occurred in a single year (1948)... and place focus on **2008/5768** - 60 years later.

## **Focus: 5768 - Chapter III (excerpt)**

### ***The Grand Cycle - Part II***

**6-29-05** - Last month, I honed our focus to a signal time period - **the period of 60 years**. - and its significance with regard to 5768. As stated then, it is sobering to consider how many different & decisive events occurred in a single year (1948)... and which place future focus on **2008/5768** - 60 years later. (They also place focus on 5775 - 5778 - from a 70-year cycle perspective - but that is the topic of a separate discussion.)  
www.insiidetrack.com

All of these very diverse events could come together as we head into 2007/2008. The following is just a small listing of the most salient events - events that have shaped the world in which we currently live. There are many others that space prevents me from discussing at this time...

...One of the other 1948 events ultimately provided the means to coordinate and oversee all of these unifying endeavors - *the birth of the Computer Age*. Without it, none of these other unifying events would be possible and/or have much significance.

And another of these events has the *potential* to conveniently provide one of the key unifying 'crises' that is still needed to bring the globe together. .. [End excerpt from Chapter III - Entire text of Chapter III - and entire Report: **Focus 5768** - available to all new subscribers.]

## **Focus: 5768 - Chapter IV**

### ***The Grand Cycle - Part III***

**7-28-05** - During the past two months, I honed our focus to the period of **60 years** and its relevance

to 5768. The number of diverse global-impacting and/or global-uniting events in a single year - 1948 - dwarfs those of any year since. If the cycle of **60 years** is as uncanny as it has been through much of recorded history, then the year of **2008/5768** - which arrives **60 years** later - should have momentous events.

Although I will elaborate on many of the events of 1948, it is important to reinforce the credibility of this particular cycle (**60 years**) - and elaborate on its diverse applications and manifestations - before doing so. This will assist in better understanding what can be expected. For now, I would just like to focus on some examples from the 20th century. [www.insiidetrack.com](http://www.insiidetrack.com)

Since this cycle is cited by noted market players/analysts like W.D. Gann, the first example comes from the world of finance. The two examples of stock markets - and their underlying economies/societies - reaching the pinnacle of 'excess' occurred in America in 1929 and in Japan in 1989... exactly **60 years** apart. Both countries/markets entered a multi-decade 'retrenchment' after these peaks.

The second example is still fresh in most of our memories. It involves surprise attacks against America. The first came in 1941 - at Pearl Harbor. The second came exactly **60 years** later - in 2001 at New York, Washington D.C. and Pennsylvania. This **60-year** cycle was cited in INSIIDE Track BEFORE the events of 9/11/01, prompting the published speculation that a '*surprise could hit America's shores*' again in August - October 2001 (see [www.insiidetrack.com](http://www.insiidetrack.com)).

A third example is even more recent and applies to both the recent past as well as the next 5 years. It involves cycles in the earth and why INSIIDE Track projected - before the 9.0 quake and tsunami of December 2004 - that the end of 2004 would usher in a 5 - 6 year period of heightened earth instability with massive earthquakes, volcanoes and tsunamis expected. A primary factor in this analysis was the **60-year** cycle. The following details some of that analysis. The reason for citing this is that periods of earth instability translate into periods of human emotional AND INVESTING instability... exactly what is expected in the coming years:

*6/30/04 - "For several years, I have focused on 2004 - 2005 as the time for the next increase in earth instability....earth-related cycles show that the frequency and intensity of global earthquakes and volcanoes should increase into 2007 - 2008..." July 2004 INSIIDE Track*

*7/29/04 - 'Shake, Rattle & Roll': "Throughout the last 10 years, I have outlined many of the longer-term earth-disturbance cycles that converge in 2005 - 2008...I want to hone in on a more contemporary cycle that involves Gann's Grand Cycle of 60 years...When measuring earthquakes of magnitude 7.0 or greater (what would be termed 'Major' earthquakes) during the past 100+ years, the period with the greatest number of these earthquakes falls between 1945 and 1950 (a 6-year period).*

*It is of interest that this small window of time also incorporates the last World War, the birth of the European Union and the statehood of Israel - an event that was Biblically prophesied over 2,000 years ago. This 6-year period was a time of instability and massive change - above and below the earth's surface... 60 years later - in 2005 - 2010 - I expect to see a strong resurgence of earthquake & volcanic activity (and great change above and below the earth's surface)...this incorporates a myriad of longer-term cycles - some of them hundreds of years in duration. It is not just the 60-year cycle, but rather the synergy of so many diverse cycles, that pinpoints this time frame and creates these expectations." August 2004 INSIIDE Track*

This is yet another example of the **60-year** cycle that has already been validated... at least initially... 1948 started a new hour of history. 2008 transitions to another new hour... and could see that clock of history strike midnight... [End excerpt from Chapter IV - Entire text of Chapter IV - and entire Report: **Focus 5768** - available to all new subscribers.]

[Other Quotes from Focus 5768:](#)

6/28/05: "I expected - and still do expect - many parallels between the period of 1941 - 1948 and the period of 2001 - 2008... like two bookends separated by a 60-year generation. This is why in 2000 and early 2001 I discussed war cycles converging in August - October 2001 and projected a Middle East war to begin in late-2001. It is also why - in April 2000 - I cited the 60-year cycle and posed the question - regarding August-October 2001 - if America was in for another surprise attack like the one in late-1941. The events change, but the cycles remain constant.

This cycle - as described in late-1999 through mid-2001 - coincided with a multi-century/multi-millennial Christian/Jewish cycle that reached fruition in September 2001. It also aligned with stock market cycles that portended a drop into September 2001. And, September 2001 completed the next phase of the oft-cited sunspot/11-year/133-month cycle of war - from the time that Saddam Hussein invaded Kuwait in August 1990. (All of these quotes - from the months and years leading up to September 2001 - can be found at <http://www.insiidetrack.com/pdf/0012001WarCycles.PDF>..)"

7/28/05: - "...The one I want to home in on now, however, involves the related combination of solar activity, earth disturbances and climate... and the impact this should have on the investing 'climate'. The diagram above is a chart of the sunspot activity since it was first consistently monitored in 1750. One of the most salient points encompasses the two largest spikes in solar activity. These two surges - from 0 to almost 250/mo. - occurred exactly **180 years** apart (1775-1780 & 1955-1960) and coincided with the two biggest voluntary 'unifications'... 1776 saw the signing of the Declaration of Independence and the establishment of the **United States of America**. 1958 saw the signing of the Benelux Treaty & the founding of the **United States of Europe**. There is another **180-year** cycle that is worth noting... *IT*

END OF EXCERPTS FROM THE INSIIDE TRACK REPORT: **FOCUS 5768**. THIS IS ONLY PART OF THE OVERALL REPORT AND IS PROVIDED AS AN EXAMPLE OF WHAT IS AVAILABLE TO SUBSCRIBERS. THIS SERIES CONTINUES IN CURRENT ISSUES OF INSIIDE TRACK AND ALSO DISCUSSES EARTH CLIMATE CHANGES, SUNSPOT CYCLES, HURRICANE & EXTREME STORM CYCLES AND MANY OTHER CYCLES COMING TOGETHER IN THIS PERIOD.
