### The Grand Illusion: Grand Scheme of Things

**October 2006** - Time is ticking away. Another hour of history has almost passed. The world may be in the proverbial ‘11th hour’. The magnificent ‘Grand-father’ clock is about to strike midnight.

In many respects, the year of 2008 (or 5768 on the Jewish calendar) represents that decisive and transitional moment in history. The periods from 2005 - 2008 and from 2008 - 2011 - like bookends around the year 2008 - represent the initial transition time.

...Leading into this time frame, the markets already have - and are still expected to - provide some powerful reinforcement to these cycles...

Precious Metals, Oil markets & the CRB have already validated this conclusion and analysis - published since late-1998 - for a major bull market from 1999 & 2001 cycle lows into at least 2006, potentially into 2011.

Stock Indices are similar. They fulfilled projections for an early-2000 cycle peak (see **Decade Bubble Effect**), an October 2002 cycle low and a rally into a late-2006 cycle peak. If a top is set in the coming months [specific dates for subscribers only], it would fulfill the ongoing forecast for a 2, 4, 8, 16 & 32-year low-low-high **Cycle Progression** PEAK in 2006. Before elaborating on this, I need to step back and examine the big picture... and show how it is all coming to a head...

#### Grand Central Station

I have no doubt that we have entered one of the most decisive periods in human history. More diverse cycles align in the coming years than at any other period in modern history.

and ultimately 2017/2018)... impacting all the nations of the earth.

This relationship was reinforced at the midpoint of this 60-year cycle. In 1973 - 1979, the world saw the risk and cost of standing behind Israel. The Yom-Kippur War of 1973 ushered in the first oil shock in America & helped to trigger a near-50% plunge in the stock market... in less than 2 years.

An unprecedented surge in inflation and in the price of Gold & Silver ensued.

...A sharp rally in Gold, Silver & the CRB has been seen, along with an unprecedented surge in Copper (a key indicator of inflation). Oil has climbed to record highs, doubling the peak of 1980 (a peak that was tested at intervals of a decade - in 1990 and again in 2000). This level - the price of 40.00/bbl - is likely to provide support in 2007 and usher in a new surge leading into 2010/2011.

...Consider the intriguing pattern of overlapping cycles from 60 years ago first described in the September 2006 INSIDE Track - that are described in the inset on page 5.

Again, just like bookends, the 12-year period that led into August 1945 could be starting anew - immediately following August 2005.

***If so, exactly 60 years - or what appears to be the Bible's definition of a 'generation' - separates these two, distinct but potentially similar, 12-year periods of modern history.***

Already, it is becoming clear that exactly 60 years separates the original *experiences* of history... from the *'doomed repeating of history'*. IT

This discussion will be continued in The Grand Illusion II with discussions and details on the timing of a nuclear crescendo, a geopolitical transformation, economic cycles, a stock market bear market, another surge in Gold, Silver & Crude Oil... and more.

Stay tuned...

HYPOTHETICAL PERFORMANCE RESULTS HAVE MANY INHERENT LIMITATIONS. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS & THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY A PARTICULAR TRADING PROGRAM. ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, HYPOTHETICAL TRADING DOES NOT INVOLVE FINANCIAL RISK & NO HYPOTHETICAL TRADING RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACT OF FINANCIAL RISK IN ACTUAL TRADING. THE ABILITY TO WITHSTAND LOSSES OR ADHERE TO A PARTICULAR TRADING PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE MANY OTHER FACTORS RELATED TO THE MARKETS IN GENERAL OR TO THE IMPLEMENTATION OF A SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY ACCOUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS - ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS.
